Projects

E-Commerce Watch Store Platform (React.js, NextUI, Tailwind CSS, Razorpay)

- Developed a user-friendly e-commerce platform for watch sales with React.js, providing a smooth and interactive shopping experience.
- Designed a responsive and visually appealing UI using NextUI and Tailwind CSS, ensuring seamless browsing across all devices.
- Integrated Razorpay for secure payment processing, allowing customers to make transactions effortlessly.

Avtarlife Metaverse Game Platform (React.js, Tailwind CSS, Material-UI, Responsive Design, PayPal)

- Developed a cutting-edge Metaverse platform where users create avatars, explore virtual environments, socialize, play games, and engage in virtual shopping.
- Designed and implemented responsive, dynamic UIs with React.js, Tailwind CSS, and Material-UI, ensuring a seamless and immersive user experience across devices.
- Integrated real-time interactions and animations for avatar customization, enhancing user engagement and exploration.
- Implemented secure payment integration for in-platform purchases, supporting virtual shopping experiences.
- Collaborated on API integration for social interactions and virtual transactions within the platform.
- Managed code quality and team collaboration using BitBucket for version control.

Onekey MLS Real Estate Platform (React.js, Tailwind CSS, GraphQL, Material-UI)

- Developed responsive, high-performance user interfaces for a real estate platform, enhancing property search and listing experiences across devices.
- Implemented dynamic search functionality and interactive property listings using TypeScript to deliver a seamless browsing experience.
- Designed and maintained a clean, modern UI with Tailwind CSS, ensuring visual consistency and improved usability.
- Integrated real-time property data for up-to-date listings, while optimizing performance and ensuring cross-browser compatibility.
- Collaborated with the team through GitLab for version control, streamlining project management and code review.

Telerapps Platform (React.js, Tailwind CSS, Material-UI, Orthanc Server, Keycloak Integration, PostgreSQL)

- Developed an intuitive interface for a medical imaging platform, allowing users to seamlessly upload and view DICOM files in specialized viewers.
- Implemented role-based access control using Keycloak, ensuring secure and personalized user experiences for various roles like physicians, radiologists, and technologists.
- Designed and optimized responsive UI components for managing users, report templates, and patient records, enabling efficient workflows across the application.
- Integrated dynamic data visualizations with interactive bar graphs to display patient activity trends for different timeframes (daily, weekly, custom).
- Enabled users to generate and download reports in multiple formats (Word, PDF, CSV, Excel), enhancing data accessibility and operational efficiency.

Online Game Zones Gaming Platform (Frontend Developer | React.js, Next.js, Material-UI, Tailwind CSS, Redux, Firebase, SEO, Google AdSense, Google Search Console)

- Developed a dynamic gaming platform enabling users to play a variety of online games directly from the website.
- Implemented responsive and interactive user interfaces using React.js, Next.js, Material-UI, and Tailwind CSS, ensuring a seamless gaming experience across devices.
- Managed global state with Redux to provide efficient game data handling and user interactions.
- Integrated Firebase for real-time data storage, user authentication, and seamless gameplay experience.
- Optimized the platform for search engines using SEO best practices, enhancing visibility and user traffic.
- Implemented Google AdSense for monetization and set up Google Search Console to track performance and improve search rankings.

Others

Portfolio Website : Developed a responsive and SEO-friendly portfolio website using Next.js, Next UI, and Tailwind CSS, with seamless deployment.
